Modules

Futuregates POS has a number of modules that are designed to make things easier for its users. It has a main Dashboard screen which displays the cardinal information that is required for business analysis. Other than Dashboard it has the following module:

- ▷ Product
- ▷ Sales
- ▷ Quotation
- ▷ Purchases
- ▷ Transfers
- ▷ Returns
- ▷ People
- ▷ Notifications
- ▷ Bank
- ▷ Accounting
- ▷ Calendar
- ▷ Setting
- ▷ Reports

Products

You can manage your inventory through the Products module. This module of our POS allows you to list all the product that are currently available in the inventory.

You can also keep the track of your stock and can adjust quantity accordingly. Following are the options that comes along with this Product module:

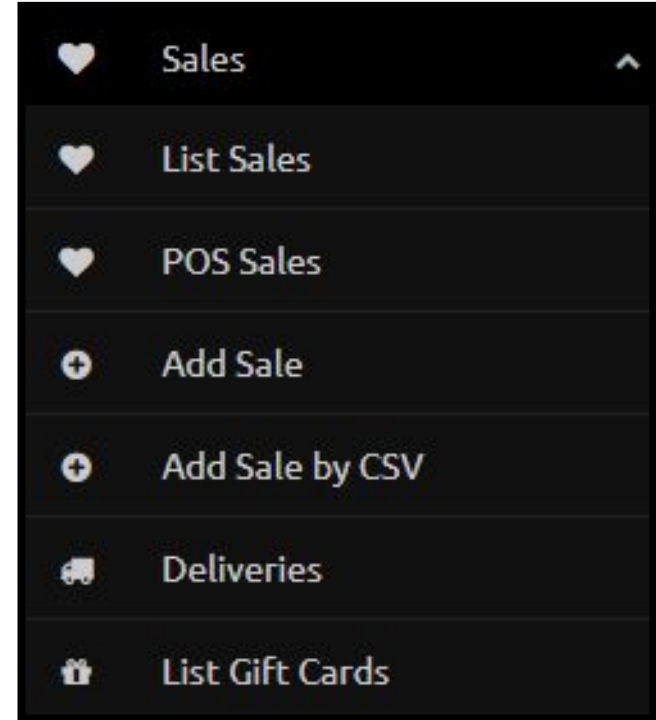

- ▷ List Products
- ▷ Add Product
- ▷ Import Products
- ▷ Print Barcode/Label
- ▷ Quantity Adjustment
- ▷ Add Adjustment
- ▷ Stock Counts

POS
software
for your
retail
business.**

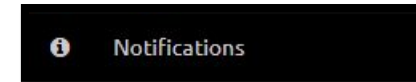

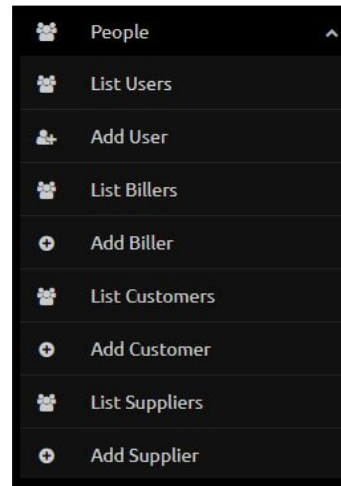

Quotations, Purchases & Transfer

Quotation module allows the business owner to keep track of the prices at which the product is traded. It is the most recent price that buyer and seller agrees upon. This module comes in handy when the business owner wants to check whether the procurement payment is clear or not.

Purchases module update the stock of your products. Adding purchase will increase the product quantity in the selected warehouse.

The Transfer module allows you to manage tasks like shifting inventory from one warehouse to another. You may also add a transfer to keep track of the specifics of the transfer, which you may accomplish with a CSV file.

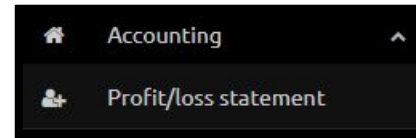

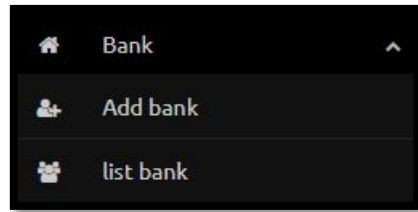

Returns, People & Notification

The return module is used to keep track of items that have been returned to any of your warehouses, stores, or branches. If a customer returns any of the purchased items for any reason, it will display in this module. This module makes it easier for the business owner to inspect the items for any flaws.

The People module is used to manage people who are either employees, salespeople for multiple firms, customers, or vendors.

The Notification module is used to show custom notifications for a certain amount of time. This message can be shown for both customers and staff. This is useful when you need a reminder for a certain task.

Bank, Accounting & Calendar

The relevance of the Bank module cannot be overstated. This module will help you keep track of payments that are either due or have already been made in order to manage your business. This module may store everything from bank account information to contact information.

The accounting module allows the user to see the company's profit and loss statement. You may easily pick a date range and export the report.

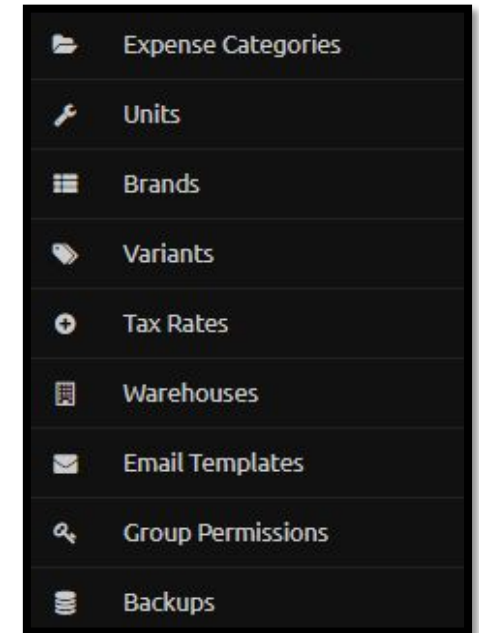

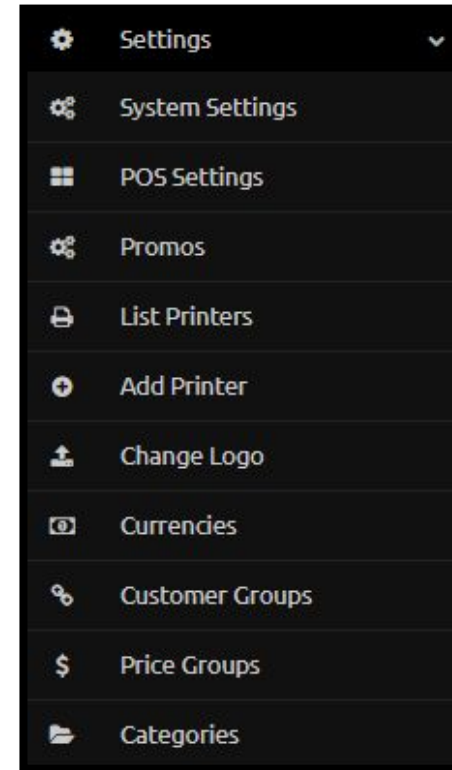

You may build an event using the calendar module based on your needs. For recognition purposes, you may give an event a description and a custom color. This module is useful when you need a reminder for some of your important business activities, such as scheduling a staff meeting.

Settings

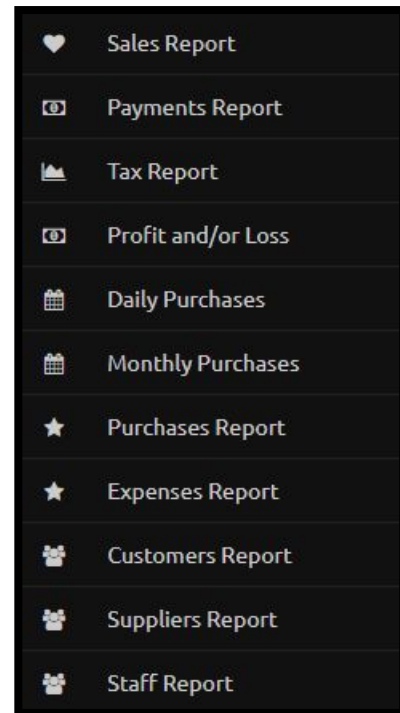

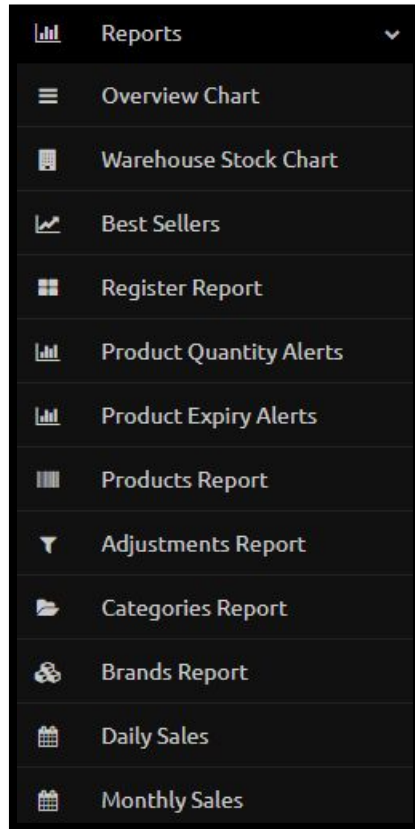

The most important tool for running a successful business is a POS software. Before you do anything else, you must first set up the POS in accordance with your company's need.

The POS setup allows you to quickly set up everything you need to get started running your business efficiently. The following features are included in the POS settings:
